Where international, state, and/or county boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries.

- 1 A * following a place name indicates that the place is coextensive with a MCD. A MCD* indicates that the place is also a false MCD; the false MCD name is shown in parentheses.
- 2 This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity. The map shows without distinction the tribal census tracts of a type of census tract defined within a Federally recognized American Indian reservation or off-reservation trust land for the purpose of providing data based on an American Indian hierarchy rather than by state and county. Where reservations are shown, the tribal census tracts are shown within the reservation. The same tribal census tract number may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract entity.
- 3 A * following a block number indicates that the block number is repeated elsewhere in the block.
